SUMMARY

- Data Analyst with experience in SQL, Python, Power BI/Tableau and has delivered dashboards, KPI frameworks, and analytical deep dives from relational data to decision-ready insights.
- Improved reporting accuracy by 25% by tightening metric definitions, implementing validation checks, and detecting anomalies in operational datasets.

EDUCATION

Master of Engineering, Electrical and Computer Engineering
University of Ottawa, ON

April 2026

Bachelor of Engineering, Computer Science
Chitkara University, India

GPA: 9.56/10

TECHNICAL SKILLS

Data & Analytics: SQL (advanced), Python (Pandas, NumPy), ETL automation, data cleaning, anomaly detection, data mining

Business Intelligence & Reporting: Power BI, Tableau, Excel (Pivot Tables, Lookups, Macros), dashboard design, KPI frameworks

Data Engineering: ETL/ELT concepts, data warehousing fundamentals; basic data modeling; pipeline monitoring

Tools & Platforms: Jira (user stories, acceptance criteria), requirements documentation, Postman, Linux

AI-assisted Development: GitHub Copilot, Cursor (AI IDE), LLM prompting (ChatGPT/GPT-4, Claude)

WORK EXPERIENCE

DATA ANALYST

University Of Ottawa

August 2025 – Present

- Owned end-to-end BI delivery: gathered requirements, wrote SQL transformations, built Power BI dashboards, and maintained documentation for stakeholders.
- Led deep-dive SQL analyses across operational datasets to surface data quality gaps and performance anomalies; increased reporting accuracy by 25%.
- Built SQL-powered KPI dashboards (500+ records) to monitor trends and exceptions and accelerate operational decision-making; improved transparency by 30%.

TEACHING ASSISTANT

University of Ottawa

January 2026 – Present

- Supporting instruction, grading, and academic assistance for undergraduate courses. Assisting professors with course delivery, tutorials, and student engagement of over 50 students; maintained high student satisfaction.

ANALYST INTERN

Calsoft Pvt Ltd

January 2023 – December 2023

- Designed scalable MySQL database models to support multi – tenant data systems.
- Developed and tested **RESTful APIs** for secure data integration; automated QA with Postman, reducing cycles by **25%**.
- Analyzed network performance data (SD-WAN), identifying bottlenecks and improving system connectivity.

RESEARCH AND APPLIED PROJECTS

eHospital KPI Pack (MySQL) — Personal Project |

[GitHub](#)

- Built a reusable KPI query pack and curated SQL views to support analytics on hospital operational and billing data.
- Developed weekly KPI reporting queries (volume, cancellations, revenue trends, billing breakdowns) using MySQL.
- Implemented data quality and sanity checks plus a runbook to ensure reliable, repeatable execution

Finance Data Analytics Capstone Project

- Built and deployed an end-to-end analytics pipeline using **SQL, Python, Excel, Tableau, and Power BI**.
- Automated **ETL and data aggregation** workflows to uncover financial trends in revenue and profit margins.
- Designed KPI dashboards that enabled executives to optimize revenue streams and cost management.

Hospital Operations Analytics Dashboard

[GitHub](#)

- Created a real-time Power BI dashboard to track admissions, staff performance, and patient demographics
- Integrated KPIs and interactive visualizations, improving operational transparency for administrators.

LEADERSHIP & ACHIEVEMENT

- Supported nonprofits by analyzing event data with Excel, delivering dashboards that improved planning and engagement.
- Recognized in **Top 5% of class (GPA: 9.56/10)**; consistently delivered projects early by streamlining workflows.
